MSc candidate at GIU working on cross-lingual and multi-turn instruction-following evaluation in LLMs — specification drift and behavioral consistency across languages and dialogue turns, with Tasmiah Tahsin Mayeesha (UNT). Fatima Pre-doctoral Fellow with Alfonso Amayuelas (Stanford HAI); PRISM Fellow with Rachel Freedman (UC Berkeley CHAI). Published in Knowledge-Based Systems (Q1, IF: 8.8).

Education

German International University (GIU)

MSc. in Data Science (German GPA: 0.7 — highest attainable; $\approx 4.0/4.0$)

October 2025 – Present

New Administrative Capital, Egypt

Egypt-Japan University of Science and Technology (E-JUST)

BSc. in Computer Science (AI and Data Science) (GPA: 3.59/4.0)

2021 – 2025

Alexandria, Egypt

Fellowships

Fatima Institute for Global AI Research

Pre-doctoral Fellow — Curiosity-Driven Learning in LLM Agents & Multilingual AI Safety

April 2026 – Present

Remote

- Investigating intrinsic reward from learning progress in LLM-based agents across inference-time, SFT, and GRPO, supervised by Alfonso Amayuelas (Stanford HAI).
- Built a synthetic noisy-TV environment to isolate surprisal, learning progress, and information gain as intrinsic reward signals, testing which remain informative under irreducible stochasticity.
- Investigating specification drift and behavioral consistency in multilingual, multi-turn LLM instruction-following, in collaboration with Tasmiah Tahsin Mayeesha (University of North Texas).
- Selected as 1 of 55 fellows from 700+ applicants.

PRISM AI Safety Research Fellowship

Research Fellow — Reward Model Interpretability

June 2026 – Present

Remote

- Interpreting personalized reward model bases under the supervision of Rachel Freedman (UC Berkeley CHAI), in collaboration with researchers at Columbia, CMU, Stanford, UC Berkeley, AIMS, and Intel.
- Selected as 1 of 50 fellows from 800+ applicants.

MIT AI Safety Fellowship

Research Fellow

June 2026 – August 2026

Remote

- Selected from 300+ applicants for an intensive summer research fellowship on alignment, scalable oversight, and mechanistic interpretability methods.

Experience

German International University (GIU) — Faculty of Informatics

Research and Teaching Assistant

September 2025 – Present

New Administrative Capital, Egypt

- Teaching and mentoring 100+ students across Big Data, Database Systems, and Intro to CS courses.
- Conducting research on adversarial attacks targeting LLMs and autonomous vehicle systems.
- Delivering tutorials on SQL/NoSQL systems, Apache Kafka pipelines, and relational algebra.

Stanford Code in Place

April 2026 – July 2026

Mentor

Remote

- Selected from thousands of global applicants to mentor for Stanford's flagship CS106A program.
- Leading weekly live sections mentoring international students in Python programming and computational thinking.
- Supporting a global CS education initiative serving 16,000+ learners worldwide.

Université Paris-Est Créteil (UPEC)

June 2025 – August 2025

Data Scientist Intern (NLP)

Remote

- Selected as 1 of 30 from 1,300+ applicants for a master's-level AI research internship as an undergraduate.
- Built an LLM-based event discovery system (TinyLlama 1.1B) over 50K+ records from 100+ sources; applied ensemble knowledge distillation using Jais 13B, Gemma 3, and TunBERT.

Egyptian Cabinet Information and Decision Support Center

July 2025 – September 2025

AI Engineer Intern

New Administrative Capital, Egypt

- Led development of a Prime Minister-sponsored RAG-based rumor detection system for the "Ask Egypt" platform.
- Built scalable pipelines for automated verification of news content from trusted governmental and media sources.

United Nations – COP27

October 2022 – November 2022

Information Communication Technology Specialist

Sharm El-Sheikh

- Collaborated with MCIT and UN engineering teams to support the COP27 mobile application used during the international climate conference.

Selected Projects

Rumor Detection RAG Chatbot – Egyptian Cabinet (IDSC) | RAG, AstraDB, OpenAI, Node.js, React

Apr 2025

- Built a RAG-based rumor detection system integrated into Egypt's national "Ask Egypt" platform, using AstraDB vector search and OpenAI models with a Node.js/React interface.

NYC Motor Vehicle Collisions – End-to-End Data Engineering Pipeline | GitHub | Python, React, Vercel

Nov 2025

- Engineered a full ETL pipeline over 2M+ crash records with schema normalization, multi-table integration, and a deployed React analytics dashboard with dynamic filters and automated reporting.

Smart IoT System for Power Quality Monitoring and Analysis (Graduation Project: A+) | Python, BERT, RAG

Jul 2025

- Fine-tuned a BERT-based NILM model achieving 95.2% accuracy on REDD for appliance-level energy disaggregation; integrated a RAG chatbot for natural-language energy insights.

Technical Skills

Research Areas: Curiosity-Driven Learning & Intrinsic Motivation, RL for LLM Agents, Reward Modeling, Mechanistic Interpretability, Cross-lingual NLP.

ML & RL: PyTorch, HuggingFace Transformers, PEFT/LoRA, vLLM, scikit-learn.

Data & Tools: Spark, Kafka, SQL, MongoDB, Pandas, Git, Docker, $\LaTeX$.

Programming: Python, C/C++, JavaScript. **Languages:** Arabic (Native), English (Advanced), German (Basic).

Honors & Awards

Full Fellowship for MSc in Data Science

2025

German International University (GIU)

Cairo, Egypt

- Awarded a full fellowship covering tuition for Master's degree in Data Science based on academic excellence and research potential.

Academic Excellence Recognition

2025

Egypt-Japan University of Science and Technology

Alexandria, Egypt

- Achieved a 4.00 GPA in the final semester (Rank: 1/120) and featured in the university newsletter for academic excellence.
- Graduated in the top 10% of the cohort, maintaining strong academic performance across eight semesters.
- Received a 70% merit-based scholarship for outstanding academic achievement throughout undergraduate studies.

SAS Curiosity Cup: Data Science Global Competition

2024

Top 15 Finalist out of 107 Global Participants

Egypt

- Ranked 15th out of 107 global participants; presented research on energy forecasting optimization using UK electricity consumption data (2009–2024).
